Education

POST GRADUATE CERTIFICATE IN COMPUTER SOFTWARE AND DATABASE DEVELOPMENT | MAY 2021 | LAMBTON COLLEGE, SARNIA, ON

Deans Honor List – 3.8/4 GPA

BACHELOR'S DEGREE IN COMPUTER SCIENCE | AUGUST 2018| SCMS SCHOOL OF ENGINEERING AND TECHNOLOGY

Experience

JUNIOR SOFTWARE DEVELOPER | APPFABS INC| MISSISSAUGA| MAY 2021 – AUGUST 2021

Projects Worked on:

- Commercial Shopping Application
Worked on a equipment's selling platform, developed the front end in react js to show the product information by consuming an API having all the product catalog information.
Also developed the product catalog database using MongoDB and axios for api creation with node js and deployed in an amazon ec2 instance.
- Internal Project for performing Quiz
Using dot net mvc core, created a quiz program, which allows users to test their knowledge in a topic of choice by taking a quiz. The result of each quiz and number of attempts being persisted in database (SQL Server).
- Internal Project for Vaccination Registration Info
Designed and developed the web application with MVC architecture using Spring Framework.
Developed handy version applications using Bootstrap Framework, HTML5 and CSS3. User provides basic information to register for vaccination. All registrations can be searched and modified. Have used hibernate framework for data persistence, involved in creating the Hibernate POJO Objects and mapped using Hibernate annotations for data persistence. Planning, task division, and prioritizing work in team by using JIRA.

UI ENGINEER (USER INTERFACE ENGINEER) | TAVANT TECHNOLOGIES | BANGALORE | JUNE 2019 – NOVEMBER 2019

Projects Worked on:

- R7 Tool by Winfield United

It is an industry-leading decision agriculture solution that provides unbiased product performance, information, and critical field data to help farmers optimize ROI potential.

Front development was based on the framework Angular 7 environment, SCSS. Pixel perfect development based on the UX designs was the primary motive, along with the development of reusable components, while making sure data populates as per the expectation with the use of unit testing.

A majority of bug fixes were performed during the migration from Angular 4 to Angular 7. Daily stand up and occasional client meetings were held, to keep track of the work.

- Radian

It has a comprehensive resource across mortgage and real estate services, powered by data, analytics, and insights.

Front end development was based on library React.js, with material UI. Look and feel was given high priority to match with the UX Design provided with the Style guide. Reusable react components were created in storybook. Jira was used for the user stories and bug lists. Client interactions and daily stand up helped in synching tasks with teammates.

PROJECT TRAINEE UI (USER INTERFACE) | TAVANT TECHNOLOGIES | BANGALORE | JUNE 2018 – JUNE 2019

Projects Worked on:

- CAR Ziplogix (California Associates of Realtors)

zipForm Plus was designed from the ground up specifically for today's agents and brokers. This is a real estate application, maximizing workflow efficiency while reducing risk related to mortgage.

Responsibilities included Front end development in Backbone.js based on MVC architecture, while utilizing the power of underscore.js, require.js, and jQuery. API integration and mapping backend data to the front end. Creation of pixel perfect and responsive screens with cross-browser compatibility using bootstrap 3. Adding accessibility and supporting multiple foreign languages.

Skills & Abilities

- Office Integration tools
- Python, Java Spring Boot, Dot Net MVC Core
- Jira, SVN, Tortoise Git/ Git Commands
- HTML5, CSS3, JavaScript
- Visual Studio Pro/ Visual Studio Code
